Software Engineer with over 10 years of experience delivering high-impact digital products across startups and scale-ups. Strong focus on product quality, team collaboration, and continuous improvement.

WORK EXPERIENCE

Payrails

Berlin, DE

Senior Full Stack Engineer

January 2026 - Today

- Built and launched a new CMS for the company website with Next.js and Sanity.
- Maintained and supported the legacy Webflow site.

Root Global

Berlin, DE

Senior Full Stack Engineer

July 2024 - November 2024

- Contributed to the launch of the new web app by supporting key frontend and backend features in a fast-paced environment.
- Led the implementation of a new tracking system, enabling scalability and user behavior insights across the platform.
- Coordinated and executed critical database migrations (PostgreSQL).

GetYourGuide

Berlin, DE

Senior Full Stack Engineer

May 2018 - June 2024

- Migrated end-to-end tests to internal services and implemented page degradation monitoring with SLO dashboards, reducing QA costs and improving system reliability.
- Built user tracking systems that enabled the Data team to complete their migration to the new analytics platform.
- Improved team agility by refining scrum practices, resulting in higher sprint predictability and increased delivery capacity.
- Designed and ran A/B tests on key user flows, increasing website conversion rate in several experiments by around 7% and informing future product decisions.

Gorilla Logic

San José, CR

Senior Web Developer

February 2017 — December 2017

- Engineered a continuous video playback feature.
- Lead implementation for video tagging and thumbnails across the whole website
- Support the product and staff with day-to-day tasks.

Informatec

San José, CR
